

Definition of Priorities for Standards Development July 2011

Priority 1)

- Standards for core services that are currently in CCSDS development,
- Standards for core services that will lead to significant benefits (operational and/or financial), and
- Standards for capabilities or services that will be committed to flight operations or tracking networks by September 2015.

Priority 2)

- Standards for core services that are essential for (or enablers to) priority 1 standards and core services.

Priority 3)

- All others.
